

What is an ecological footprint?

https://www.youtube.com/watch?v=g_aguo7V0Q4

How many Earths does it take to support humanity?

source: www.footprintnetwork.org

By country...

[http://data.footprintnetwork.org/#/?](http://data.footprintnetwork.org/#/)

Agree or disagree: “The US gives more to the world, so it can take more from the world.”

Let's measure our own...

<http://www.footprintcalculator.org/>

For each slide, enter the “extra information” where you can. Once you're done, screenshot your results and then click on the links for solutions/ideas for reducing your footprint.

My footprint... :(

RESULTS

Your personal Earth Overshoot Day is:

03 Apr 

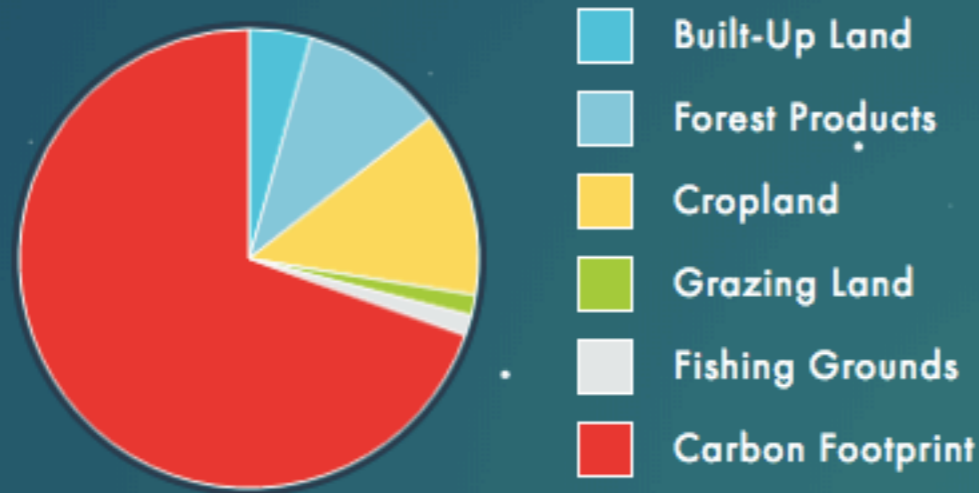

If everyone lived like you, we would need

3.9 Earths 

RESULTS

By Land Type

By Consumption Category

6.7

Your Ecological Footprint 
(global hectares or gha) 

13.9

Your Carbon Footprint
(CO₂ emissions in tonnes per year)

71

Your Carbon Footprint
(% of your total Ecological Footprint)

Let's break this down...

- Can we evaluate the footprint of one aspect of our lives?
 - one meal?
 - one mode of transport?
 - one item of clothing?
- Let's give it a whirl... Check out this example about a water bottle first: <http://www.montgomeryschoolsmd.org/uploadedFiles/curriculum/outdoored/programs/waterbottlefactpages.pdf>

- Does lessening our impacts necessarily mean reducing our quality of life? Are there ways of enhancing your quality of life while reducing your impacts
- How else could you maintain a comfortable and fulfilling lifestyle, but lower the associated environmental impacts?
